ELECTRICITY BILLS

The typical UK household spends around

£1,254

per year on energy bills.

By turning off appliances when they are not in use, households can save approximately

£35

per year on energy bills.

WATER BILLS

The customary water bill in the UK is

£415

per year

Households can save roughly

£25 per year

on their water bills by fixing leaking taps and installing water-efficient appliances.

FOOD COSTS

The usual UK household spends around

£60 per week
on groceries.

By planning meals ahead of time and buying only what you need, households can save approximately

£30 per week
on groceries.

TRANSPORTATION COSTS

The typical annual cost of running a car in the UK is approximately

£2,041

By using public transportation instead of driving, households can save around

£30 per year
on transportation costs.

SUBSCRIPTION COSTS

The customary UK household spends around

£557 per year

on subscriptions, including TV, music, and magazine subscriptions.

By cancelling unnecessary subscriptions, households can save roughly

£200 per year

COFFEE

The standard UK consumer spends around

£2.70
per cup of coffee

By brewing coffee at home instead of buying it at a coffee shop, households can save approximately

£800
per year

if they buy a daily cup of coffee.

BAME DATA

Energy Saving Trust has stated that BAME households are more likely to live in **POORLY INSULATED PROPERTIES**, leading to higher energy bills.

BAME households are at a higher risk of fuel poverty, defined as spending over **10% OF THEIR INCOME ON ENERGY BILLS** for warmth, compared to other ethnic groups.

(Source: End Fuel Poverty Coalition)

THE AVERAGE HOURLY PAY GAP between White-British and BAME workers is **14%**.
